Professional Experience

Full-Stack Web Developer (Unpaid collaboration), FuturePoint IT Solutions

Jan 2025 – Present

- Developing responsive marketing and informational landing pages for Xter Enterprise.
- Building an internal Employee Portal with Next.js, allowing employees to view dashboards, apply for leave and manage personal records.
- Working on all layers of the app, from design to database.

Software Developer, Brigada Mass Media Corporation

Aug 2015 – Aug 2020

- Designed and developed an integrated in-house system for sales, collection and inventory using C# and MS SQL, improving operational efficiency in 47+ branches.
- Automated manual processes, reducing data entry errors and improving task completion time.
- Led user trainings sessions, ensuring effective system navigation and provided comprehensive user support.

Software Developer, ICEG Systems Inc.

Sep 2013 – Jul 2015

- Developed and tested modules for Accounting, Human Resource and Payroll systems using VB .NET with DevExpress and MS SQL.
- Conducted user trainings sessions to improve proficiency and streamline on-boarding processes.
- Tested, debugged and maintained modules for long-term stability and optimal functionality.

Software Developer, Dole Philippines Inc.

Oct 2012 – Aug 2013

- Designed, developed and tested modules for the Production system using ILE RPG.
- Conducted user trainings for effective system utilization.

Data Center Operator, Dole Philippines Inc.

Jul 2011 – Sep 2012

- Provided user support, resolving basic issues and escalating complex problems.
- Conducted server monitoring for security, reliability and responsiveness.
- Performed routine maintenance tasks, updates and backups for optimal server performance.

Professional Development and Relocation

Sep 2020 – Dec 2024

- Relocated to Germany and pursued integration courses to transition into the local job market.
- Completed CareerFoundry's Full-Stack Web Development Program, specializing in JavaScript, React, and Node.js.
- Pursued self-directed online courses and projects in C#, ASP.NET Core, Python, JavaScript and Angular with the goal of enhancing and expanding my web development skills.
